REPORT

Eye Donation Awareness program

(5th September, 2023)

To enable another person obtain vision is one of the best forms of charity. Even after death the donor lives in the eyes of recipient. Eyes from a dead person can enable two blind people to acquire vision. With this objective our college organized an eye donation awareness program on 5th September 2023 for the students.

The program was inaugurated by the Principal of college, Dr. Sapna Nanda motivating the students for eye donation and encouraging them . Dr. Tanu Singh, Assistant Professor from GMCH – 32, Chandigarh and his team was the key note speaker of the program.

The team explained that millions of people suffer from blindness due to various reasons, including corneal diseases, injuries, and congenital disorders. Eye donation can help restore vision to those who are blind or visually impaired.

The team also explained the process of eye donation, which involves removing the cornea from the deceased donor's eyes and transplanting it into the eyes of a recipient. The cornea is the clear, outermost layer of the eye that helps focus light on the retina.

The doctor also spoke about the importance of eye donation from a medical perspective. He explained that corneal transplantation is a safe and effective procedure that can restore vision in most cases. He also dispelled some common myths about eye donation, such as the belief that it disfigures the donor's face or that it is against religious beliefs.

Dr. Kusum concluded the event by delivering the formal vote of thanks, whereby she mentioned the importance of having vision in life and how eye donation can make that possible for those who lack that vision. Audience was motivated to make their contribution in this Nobel cause as a service to the humanity and to aware people further about it.
